---

## Career Objective

**Full Stack Developer** skilled in **React, Django, and Django REST Framework**, capable of building scalable, database-driven web applications. Experienced in developing **clean REST APIs, improving frontend performance, and designing efficient PostgreSQL/MySQL schemas**. Strong foundation in **C,C++, Python, JavaScript, data structures, and problem-solving**, with a focus on usability, performance, and maintainable architecture. Committed to delivering reliable, high-quality solutions within collaborative engineering environments.

---

## EDUCATION

BSC in Computer Science and Engineering (CGPA: 3.96)

City University

---

## PROJECTS

### 1. Grocera (Online Grocery Store): [Live Site](#) | [GitHub \(Client site\)](#) | [GitHub \(Server Side\)](#)

**Technologies:** React, DRF, Tailwind, PostgreSQL/Supabase, SSLCommerz (Payment Integration), JWT Auth

- Built **20+ REST APIs** for products, orders, cart, and checkout.
- Implemented **3-role access control** (admin, seller, customer) with secure JWT auth..
- Integrated **payment workflow (SSLCommerz sandbox)** and transactional order handling.

### 2. Book-Heaven (Library Management System): [Live Site](#) | [GitHub \(Client site\)](#) | [GitHub \(Server Side\)](#)

**Technologies:** React, DRF, Tailwind, PostgreSQL/Supabase, JWT Auth

- Built **authentication and membership validation** for borrowing and returning books.
- Implemented **search, filters, and borrowing history** for faster data access.
- Enforced **membership validation and borrow limits** at API level.

### 3. Event-Master (Event Management): [Live Site](#) | [GitHub \(Repository\)](#)

**Technologies:** Django, HTML, Tailwind, PostgreSQL

- Developed event reservation workflows with views for **upcoming, ongoing, and past events**.
- Implemented **role-based access** for users, managers, and admins to manage event creation and approvals.
- Structured models, views, and templates to keep logic modular and maintainable.

---

## SKILLS

**Programming Languages:** C, C++, Python, JavaScript, SQL

**Frameworks & Libraries:** React.js, Django, Django REST Framework, Tailwind CSS, HTML, CSS, Bootstrap

**Databases & Tools:** PostgreSQL, MySQL, Supabase, Git/GitHub

**Deployment:** Vercel, Netlify, Render

**Other Skills:** Problem-solving, Leadership, Teamwork, Communication

---

## ACHIEVEMENTS & CERTIFICATIONS

- Completed the CSE Fundamentals with Phitron: Spring 2024 ([Certificate](#)).

---

## EXTRA-CURRICULAR ACTIVITIES

- Participated in ICPC (International Collegiate Programming Contest) and various university-level coding competitions, demonstrating problem-solving and algorithmic skills.
